

Solid expertise, uncompromising reliability and competitive pricing has enabled Teichmann Agric to partner with leaders in agriculture while earning a reputation for having a strong work ethic and the ability to get the job done on time and within budget.

All-round agricultural service provider

The company was officially formed in 2009, having ventured into Zambia a few years earlier to tackle an agricultural expansion project for one of Zambia's leading sugar producers.

During the two year project Teichmann Agric successfully bush cleared and prepared 3 200 hectares of land for planting, including GPS levelling, ridging and gravelling of centre pivot wheel tracks and the construction of five storage dams.

The civils aspect of the project entailed bulk earthworks and the construction of 35 kilometres of concrete irrigation canals, culverts, bridges, inlet and outlet structures and two large pump stations, which were completed in 20 months under acceleration.

Due to the success of the expansion project, Teichmann Agric has been able to realise opportunities in cane haulage. In addition to the sugar industry, Teichmann Agric has a growing presence in the maize and soya industry where the company's expertise and capacity is used for bush clearing and land prep.

Today Teichmann Agric's capabilities include:

- Bush clearing
- Land preparation
- Mechanical covering
- Land levelling
- GPS laser levelling and surveying
- Road construction and maintenance
- Drainage
- Cane loading and haulage
- Agricultural infrastructure
- Dam construction
- Minor concrete structures
- Plant hire

OUR TEAM IS OUR STRENGTH

Teichmann Agric is managed by a dedicated team with a wealth of experience across a wide variety of crops and farming regions as well as experience in plant hire, construction and agricultural contracting. Our people, who are trained and highly skilled in their respective areas, are sourced from the countries and areas in which the company operates.

Equipment built to deliver and last

Complementing our depth of expertise is an extensive fleet of purpose-built, modern agricultural plant and equipment. Supplied and supported by world leading original equipment manufacturers, Teichmann Agric has carefully selected this fleet for its ability to deliver maximum uptime and productivity.

Our fleet comprises:

- Haulage tractors
- Cane trailers
- Cane loaders
- Excavators (20t)
- Heavy duty dozers
- Articulated Dump Trucks (20t)
- Trucks
- Scrapers
- Heavy disc harrow 36"
- Heavy duty 7-tine ripper
- Cane ridgers
- Cane covering machines
- Agricultural tractors (120hp, 170hp, 350hp and 480hp)

Understanding the challenges and harsh African conditions, Teichmann Agric has embraced technology using it to our, and ultimately our customer's, advantage. The whole fleet is fitted with Geotab's live vehicle tracking system, with operator identification, to facilitate effective management of the operation.

OUR VISION

Teichmann Agric sees huge potential and a desperate need to develop sustainable agriculture in Africa to meet the continent's growing food requirements and is committed to developing the agricultural services business in Africa by expanding into other countries where we will look to establish our contracting operation as well as develop farming.
