

**PLANT &  
EQUIPMENT  
HIRE**

The Teichmann Group's Plant & Equipment Hire division has been in operation since 1995 when the business first began as a plant hire company. One of our key competencies and principal objectives is to build lasting relationships for the mutual benefit of our company and our clients. From this cornerstone the company has evolved, strategically diversifying to now offer services and equipment to the Mining, Industrial Construction, Power & Energy, Oil & Gas, Water, Infrastructure and Agricultural industries.

## PREMIUM EQUIPMENT

Teichmann has a policy of purchasing world-class plant & equipment from reputable suppliers who have a well-established footprint throughout Southern and Central Africa. This means the plant hire division and our clients can rely on good quality, reliable equipment that is backed by professional support and backup warranties.

## CAPACITY

Our extensive fleet of modern equipment is suited to varied, large scale contracts. Combined with a culture of flexibility, the Teichmann team strives to meet our clients ever-changing needs whilst exceeding their expectations.

## ACCELERATED MOBILISATION

Machine intensive projects, often in extremely remote parts of Africa, have allowed Teichmann to gain vast experience in mobilising expeditiously into many of the SADC countries. Facilitated by our in-house transport and logistics division and a dedicated fleet of lowbeds, our clients are assured of seamless local and cross border mobilisation.

## RELIABLE BACKUP SUPPORT

The Group's teams of highly skilled mechanics maintain our fleet. Daily maintenance checks ensure the fleet remains a prized asset whilst allowing the Plant & Equipment Hire division to offer more competitive rates to our clients.

## OPERATORS

We pride ourselves on being highly principled and stand firmly for ethical business practices. One of our core values is to provide social upliftment, employment, training and experience through ongoing investment in our people and the people in the communities in which we operate

## TRAINING

Extensive, ongoing operator training decreases costly downtime and reduces maintenance costs while promoting productivity and the longevity of our fleet.

# SUPPORTING GROWTH IN AFRICA SINCE 1995
