

# TRANSPORT & LOGISTICS

Since inception in 1995, the Teichmann Transport and Logistics division has been managing flexible and cost-effective overland transport solutions across border to various countries within Southern and Central Africa.

As part of the Teichmann Group, we pride ourselves on being highly principled and standing firmly for ethical business practices and safe operating environments in order to deliver a quality service on time, safely and within budget. Currently servicing the Mining, Industrial Construction, Power & Energy, Oil & Gas, Water, Infrastructure and Agricultural industries, we have a proven track record of building lasting relationships for the mutual benefit of our company and our clients.

## APPROACH

Our practical approach to projects, decades of experience and hands-on management style enables us to offer a fully integrated solution-driven service. In order to surpass our clients' expectations. Our first priority is to gain a thorough understanding of your business and your requirements. Thereafter our dedicated and fully equipped team will design and plan the optimal and most cost-effective transport solution for your business.

## SERVICES OFFERED

**Complete Customs Clearance Solutions** - Our experienced specialist agents professionally handle all aspects of clearance, from Bivac inspections to final customs clearances.

**Transportation** - A dedicated team ensures drivers arrive at loading points on time, that their vehicles are loaded correctly and that these loads arrive at their destinations timeously.

**Tracking** - All of our vehicles are fitted with live tracking devices providing real-time, in-transit tracking. This way, we keep our clients fully informed throughout the process and can anticipate any delays to the load.

## CAPACITY

The Teichmann Transport and Logistics division is able to move large scale plant and equipment, spares, containerised cargo and break bulk. Loads can weigh anything from 500 kilograms to 70 tons, on a normal or abnormal basis.

## FLEET

Our extensive fleet of premium, modern equipment consists of LDVs, Box Trucks, Super Links, Step Decks and Axle Low Beds.

## ACCELERATED MOVEMENTS

Our team has vast experience in moving loads expeditiously into many of the SADC countries thanks to the Group's various divisions working on machine intensive projects, often in extremely remote parts of Africa. This has often required tenacious and innovative thinking, which ultimately has allowed every load to reach its destination, no matter how difficult the terrain.

## RELIABLE BACKUP SUPPORT

Our teams of highly skilled mechanics maintain the Group's plant and equipment. Daily checks ensure the fleet remains a prized asset to keep our rates competitive and minimise delays to loads.

## DRIVERS

Our drivers receive extensive, ongoing training, which effectively reduces costly downtime and incidents on the road. It also satisfies our need to provide social upliftment, employment, training and experience through ongoing investment in our people and the people in the communities in which we operate.
